

Smaug is selecting her classes, and she wants them spread out so she has time throughout the day to do her work, so she can get to her main hobby, Designing

However, Smaug doesn't know how much of that "free" time will be actually free, or how much of it will be spent having to travel!

Thanks to the Class Map App, she knows just how much travel time is actually required for her classes, and how much free time she'll have, before the semester start!
